In the Specification:

Please amend the specification as follows:

Page 1, paragraph 1:

Field of the Invention

The invention relates to a food oil product, which is based on turnip rapeseed oil or rapeseed oil

and contains antioxidant. The invention relates especially to a turnip rapeseed-based or

rapeseed-based food oil product replacing butter, margarine and flour treatment agents in baking

and food processing. The invention also relates to the use of a food oil product.

Background of the Invention

Page 2, third full paragraph:

Summary of the Invention

The purpose of the invention is to remove the problems connected to especially the preservability

of a product and a food product manufactured by means of the product, and to provide a food oil

product containing double bond fatty acids, which remains unrancid significantly longer than the

present products, and which is based on natural antioxidants. The natural antioxidants here refer

2

to antioxidants, which can be found in nature but which can either originate in natural materials or be manufactured synthetically.

Page 4, first paragraph:

<u>Detailed Description of Embodiments of the Invention</u>

In the following, the invention will be described more in detail by means of some examples, which do not restrict the invention.
